0 1 — T H E N A M E

What RKADE means

RKADE is a constructed word where RK is capitalised intentionally. It stands for Raffay and Kushan — the two founders. The remaining letters form the word arcade.

The word arcade comes from the Latin arcus, meaning arch. Historically an arcade is a series of arches — a passageway that connects one place to another. Architecturally it is the structure that holds things up while creating a path forward.

For RKADE, this is the core meaning: we are the passage businesses walk through to get from where they are to where they want to be. We are the structure. We create the path.

Correct usage:

- **Written:** RKade — capital R, capital K, lowercase ade
 - **Never:** Rkade, rkade, RKADE (in body copy), R-Kade, R Kade
 - **Domain:** rkade.co
 - **Email:** contact@rkade.co / help@rkade.co
 - **Tagline:** AI Automation Consultancy · Dubai, UAE
-

0 2 — T H E L O G O

Logo system

The logo consists of two elements: the arch mark and the wordmark RKade. They can be used together or the arch mark can be used as a standalone icon. Six versions are available to cover all use cases.

Light — Horizontal

Primary version · Use on cream/white backgrounds · Website header, documents, presentations

Dark — Horizontal

Use on dark backgrounds · Email signatures, dark-mode designs

Light — Portrait (Stacked)

Use in square formats · Social media posts, printed materials

Dark — Portrait (Stacked)

Use on dark backgrounds in square formats

Icon — Profile Picture

Standalone arch mark · Social media profile pictures, favicons, app icons

Logo rules:

- Minimum size: 120px wide for the horizontal lockup. 40px for the icon only.
- Clear space: maintain clear space equal to the height of the K around the logo on all sides.
- Never stretch, rotate, recolour, or add effects to the logo.
- Never place the logo on a busy background or any colour outside the brand palette.
- Never recreate the logo in a different font or redraw the arch mark.
- File formats: SVG for digital, PNG with transparent background for general use, PDF for print. The original AI file is the master — never edit anything else.

The RK treatment:

In the wordmark RKade, the letters RK are visually heavier than ade. This split is intentional — it represents the founders' initials embedded within a real word. Any reproduction of the wordmark must preserve this visual distinction.

03 — COLOUR PALETTE

The brand colours

Four primary colours make up the palette. All warm-toned — nothing cold, nothing neon, nothing generic tech. The palette is designed to read as premium and established.

Swatch	Name	Hex	Usage
	Dark Ink	#2C2218	Primary dark background, text on light, logo background
	Gold Accent	#C9A84C	CTAs, highlights, RK treatment, dividers — accent only
	Cream	#F5F0E8	Primary light background, body text on dark
	Warm Muted	#8A7060	Secondary text, captions, labels, subtext
	Border	#D4C5A9	Dividers, borders, separators
	Deep Black	#110F0D	Deepest dark — use sparingly

Colour rules:

- Gold is an accent only. Never use it as a background for large areas.
- Never use electric blue, neon, or gradient fills — explicitly off-brand.
- Dark version: #2C2218 background, cream text, gold accents.
- Light version: #F5F0E8 background, dark ink text, gold accents.
- Do not introduce new colours without sign-off from both founders.

04 — TYPOGRAPHY

Fonts

Two font families. One for display and headlines, one for body and UI. Never mixed beyond their intended roles.

Primary — Baile (Cormorant Garamond as digital substitute)

- **Role:** Headlines, display text, the wordmark RKade, large numbers
- **Weight:** Light (300) and Regular (400) for headlines. Semibold (600) for the wordmark only.
- **Style:** Serif. Elegant, editorial, premium. Never bold or heavy.
- **Digital substitute:** Cormorant Garamond — Google Fonts, free.

Secondary — Montserrat

- **Role:** Body copy, UI labels, captions, buttons, navigation
- **Weight:** Light (300) for body. Medium (500) for labels and buttons.
- **Style:** Clean geometric sans-serif. Pairs with the serif without competing.

Typography rules:

- Headlines: Cormorant Garamond, light weight, large size, generous line height.
- Body: Montserrat, light weight, 14-16px, 1.7-1.8 line height.
- Never use bold body text except for emphasis on a specific word or phrase.
- Italic in Cormorant Garamond is a feature — use it for headline emphasis.
- Letter spacing: 0.2em or higher for all-caps labels and eyebrows.

05 — BRAND VOICE

How RKADE communicates

Direct, warm, and confident. Not academic. Not salesy. Not generic tech. RKADE speaks like an expert who knows what they are doing and has no need to prove it.

Four principles:

- **Direct:** Say what you mean. One sentence where others use three. No hedging.
- **Specific:** Reference real things — real numbers, real situations, real businesses.
- **Warm:** Professional but human. Talking to a business owner, not writing a whitepaper.
- **Confident:** Never apologise for what you do. State it plainly.

What to avoid:

- AI buzzwords: leverage, synergy, ecosystem, holistic, cutting-edge, seamlessly, robust.
- Em dashes in casual communication — they read as formal and AI-generated.
- Passive voice. Write actively.

Examples:

Wrong: 'We leverage cutting-edge AI technology to provide holistic solutions for your business needs.'

Right: 'We build the system that books your next clients. You close.'

Channels and assets

Website:

- **Domain:** rkade.co
- **CTA:** Book a Free Audit — links to calendly.com/kushan-rkade/30min

Email:

- **Primary:** contact@rkade.co
- **Support:** help@rkade.co
- **Outreach only:** sales@kres-labs.com — separate domain, never use rkade.co for cold outreach

Social media:

- **Instagram:** @rkade.co — educational content, 2-3x per week
- **LinkedIn:** Company page — same content cadence
- **Profile picture:** The icon-only DP version of the logo

Booking:

- **Discovery calls:** calendly.com/kushan-rkade/30min — 30 minute free audit

What RKADE is and is not

RKADE is an AI automation consultancy. We build custom systems that solve specific operational problems for UAE SMBs. We are not a SaaS product, not a marketing agency, and not a generic AI tools company.

Current products:

- **Jewellery CRM:** Custom CRM for gold and diamond retailers. Inventory, customer records, custom order workflow, gold rate widget, invoicing.
- **Sales CRM:** Pipeline management, deal tracking, customer records for B2B businesses.
- **Outreach engine:** AI-powered cold outreach that finds prospects, writes personalised emails, and books meetings.
- **Lead gen tool:** Web app that sources and enriches business leads. Live at leadgentool.rkade.co

Target market:

- **Primary:** UAE SMBs — jewellery retailers, tourism operators, professional services firms.
- **Geography:** Dubai first. UAE-wide next. GCC as the product scales.
- **Decision maker:** The business owner — not the employee.
